

NetWoRM Newsletter

April 2007 - Happy Easter

Congratulation to our successful meeting in Heidelberg!

The aim of this symposium was to learn from past experiences and find ways to continue this project in an improved way. Therefore the question of sustainability was one major topic. Besides our Minerva partner from Austria, Finland, France, Great Britain, Romania and Spain further international partners from Canada, Brazil, the Netherlands, Spain and Tunisia attended the meeting. The power point presentations of the Munich group as well as several others can be found online (www.networm-online.eu). The group discussions as well as short descriptions of our new partners are summarized in the protocol (s. website).

Summary

- Implementing and dissemination crucial to guarantee sustainability
- Case use has to be a win-win situation for students and teachers
- Cases have to be a fixed part of the curriculum
- Use your university email address for automatic registration
- Things take time....

Quiz! What is this?

NEW IDEAS - New EU proposal

The idea is to improve the national and international dissemination of NetWoRM and to establish the programme locally and globally. Only with more dissemination our major target - sustainability-will be possible. The European Union published a call for their LIFELONG LEARNING PROGRAMME a few months ago where we want to submit a proposal. More information under:
